The former is known to be a disease prevalent during those seasons when much rain, cloudiness, and wet. muggy weather prevail. Every plant disease may be said to have its certain favorable meteorological conditions. Whetzel, writing on the bacterial canker of apple, states: It is well known that the blight in the twigs of pear and apple trees is more active and severe during a continued period of warm, muggy weather. The same is to be said of the cankers on the limbs and bodies of the trees. It was repeatedly noticed during the past season that the active spread of the cankers was coincident with certain periods of rainy weather. The progress of the disease through the bark is always abruptly checked on the appearance of bright, sunny days. The recurrence of favorable weather may often cause a...
