Ho, Rumjahn Hoosain, The Chinese people constitute more than a quarter of the world's population, yet until now there has been no single volume that summarizes and integrates the wealth of data available, in English and Chinese, on the psychological functioning of the Chinese people. "The Psychology of the Chinese People" fulfills this role, emphasizing the prime areas of research, both past and present, the theoretical models used to integrate these findings, and areas for future research. The book also provides a cross-cultural comparative perspective on the data. The topics covered include socialization, perception, cognition, personality, psychopathology, social behavior, and organization.
