

Loco-Motion, Physics Models for the Classroom: 25+ Hands-On Projects (Paperback)

By Ed Sobey

Zephyr Press, United States, 2005. Paperback. Book Condition: New. 262 x 216 mm. Language: English . Brand New Book. This title is intended for ages 10+. Using the concept of learning by doing , this classroom activity book contains an impressive collection of instructions and guidelines for building physics models that fly through the air, drive on the ground, or paddle through water. Students will use experimentation and analysis in these intriguing physics projects to inspire new and improve upon old designs. Each model is presented in a specific educational context, so teachers can instruct with hands-on experimentation. Students will explore science concepts such as gravity, air pressure, kinetic energy, Newton s laws, electrical circuitry, buoyancy, and inertia. Detailed materials lists and step-by-step directions for building models are structured so that the teacher becomes the director of research and development in a classroom of young engineers. The models discussed in the book include gravity-powered cars, balloon racers, hovercrafts, gravity ball launchers, flying saucers, catapults, chemical mini-rockets, swamp boats, and submarines. Kids are encouraged to test, modify, and redesign based on observation of their models in action, while working co-operatively and learning from one another s successes and failures. The engaging...
